

Toll Roads of Buckinghamshire

with their connections into neighbouring counties

by Peter Gulland

The story of toll roads - the turnpike roads of the 18th and 19th centuries - is the story of the making of the main road network that we still use today.

In this book Peter Gulland brings together a detailed investigation of the records of the organisations that built them, Buckinghamshire's turnpike trusts, with on-the ground observation of the roads that they planned, developed and built.

The results will make history visible on roads that you travel every day.

326 pages in A4 paperback format, with 37 maps and illustrations. ISBN 978-0-9957177-3-2

£12.00 plus £3.00 post and packing
